

Good morning Ya'll:

I have opened all Multiple-Choice progress checks on College board for the units to be tested on. If you read the updates, then you know your test is 45 min Free Response. I will open FR starting next week. I want to give you some time to practice MC first. We haven't completed everything they will be testing on so I'm searching for resources and ideas to teach it remotely. Probably videos from you tube and some recorded messages from myself.

\*Missing tests or quizzes, I'm waiting to hear back on what they want us to do if you've missed a test or quiz. I will let you know as soon as I know.

Stats: you can read your text book for chapter 3 and chapter 10, going through the process described earlier in the school year:

Suggested pacing to complete new material:

1. Chapter 9 practice test.( Monday)
2. Read chapter 10 and look through notes online: (Tuesday and Wednesday)
3. Chapter 10: Practice test( Thursday and Friday)
4. Read chapter 3 and find notes on website (Monday and Tuesday)
5. Chapter 3 practice test(Wednesday and Thursday)

Start MC practice on College board, open book and notes.

Calc: Videos are coming your way soon, luckily the last unit isn't awfully new, we've been working with differentials quite a lot already. We are just taking a different approach to them.

- Suggested pacing:

**Complete at least 1 unit of MC** Practice per day. Some of them were unlocked in October so you may have completed them.

FR will be open Next week.
